Questions 15-19 are related to the text below.

Night work

Can you imagine what it would be like working at night? You'd start your day when everyone else was going to bed, and you'd go to bed when everyone else was getting up. Is that really a natural way to live? These days more and more jobs need to be done at night. Most big hotels offer 24-hour room service, and need staff at reception and working in the bars. Many companies have 24-hour call centres to deal with emergency enquiries. However, few people can work well at night. This is partly because we cannot easily change our sleeping habits. If working at night stops you from getting the amount of sleep you need, you will damage your health.

Humans are used to sleeping at night and being awake during the day, and they'll never be able to do things the other way round. The problem is that today's 24-hour society isn't going to slow down which means that night-workers will remain.

15. What is the writer's main aim in writing the text?

A) To describe the importance of work.
B) To say how working at night can be bad for you.
C) To suggest how people can change their way of life.
D) To recommend people spend more time sleeping.

16. What does the writer say about night jobs?

A) Many people refuse to work at night.
B) It is easier than working during the day.
C) It is easier to demand better working conditions.
D) There is a variety of them.

17. What would a reader learn about sleep from the text?

A) Everybody needs the same amount.
B) It's difficult to change your sleeping needs.
C) People sleep better in the early morning.
D) Many people need more than 11 hours' sleep.

18. What does the writer say about the future?

A) Fewer people will work during the day.
B) Some jobs will always be done at night.
C) People will demand fewer services.
D) People will work longer hours.

19. Which of the following could also be a title for this text?

A) A good night's sleep can change your life!
B) A worker that sleeps more, works more!
C) Society is changing but bodies are not!
D) The loneliest jobs in the world!

20. What does it say?

Questions 6 and 7 are related to the text below.

Salads are healthier than hamburgers

Did you know that salads can have more calories than a medium-sized pizza? This is because of the cheese, meat, and oil they contain, which are not exactly low in calories. Not all salads are bad and it is true that most of them are healthier than hamburgers and chips, but be careful! To decide which salads are healthy and which are not, simply have a look at the fat, carb and salt contents of the salad you are about to order – that should help you decide if you want it or not! Tip: Always ask for a salad and the dressing separately. That way you can control how much you put on.

6. Salads can be surprisingly high in calories because...
A) there is too much salt in them.
B) the quality of the food is poor.
C) they have hidden ingredients.
D) they can have a lot of fats.

7. The author suggests...

Questions 16-20 are related to the text below.

A healthy mind

The brain is the most amazing part of our body and despite all medical research nobody understands everything about it. But just like our bodies, it needs to be cared for in ways that can be quite simple. Getting a good night's sleep, eating a balanced diet and taking deep breaths are all important methods of looking after both your body and your brain. Many people think their brain will slow down with age and their memory will get worse as a result. The truth is, just like your body, you can also improve your mind. People can improve memory by imagining what they need to remember. Another way of improving your mind is to make sure you regularly visit new places and have new experiences. Personally, I find learning Spanish is a great way to keep the brain working, but communication in any language is important. Having a conversation is so much better for your brain than staring at a computer screen or at other people talking on TV.

16. What is the writer's main aim in writing the text?

A) To explain how the brain works.
B) To talk about problems with the brain.
C) To describe how clever she has become.
D) To suggest the brain needs attention.

17. What does the reader learn about the writer from the text?

A) She has a computer.
B) She is learning another language.
C) She likes shopping.
D) She enjoys travelling.

18. What does the writer say about the brain?

A) It should be treated in a similar way to our bodies.
B) Not enough medical research is being done on it.
C) It definitely becomes less quick when we are older.
D) It ages faster than our bodies.

19. What does the writer say about her own memory?

A) It has been possible to make it better.
B) She finds objects more difficult to remember than numbers.
C) It has got worse over the years.
D) She often forgets birthdays.

20. What would be another title for the text?

A) Easy ways to develop your mind.
B) The latest research into the brain.
C) The amazing power of memory.
D) How to remember things you thought you'd forgotten.

Questions 7 and 8 are related to the text below.

Mosquitoes

There are about 3,500 species of mosquitoes in the world. The word "mosquito" means "little fly" in Portuguese. Mosquitoes are members of the scientific order *Diptera*, the "True Flies." Like other "True Flies," they have wings. But they are different from some True Flies; their wings have scales. These tiny scales help ***eliminate*** the effects of friction. This helps the mosquitoes skim quickly and efficiently through the air, making them almost impossible to swat. The familiar high-pitched, annoying buzz of the mosquito comes from the sound of its wings beating 600 times per second!

7. Why do mosquitoes' wings have scales?

A) The scales reduce the effects of friction.
B) The scales make the mosquitoes fly more efficiently.
C) The scales help the mosquitoes float in water.
D) Both A and B are correct.

8. If you *eliminate* something, you...

A) make it smaller.

Questions 2 and 3 are related to the text below.

Fast Food is unhealthy and makes you fat

This myth is partially true but not because it is fast food. Any food consumed in large amounts will make you fat. It is also true that most fast food contains high amounts of fat (sauces, cheese and meat), sugar and lots of salt, which encourages you to drink more. If you drink water, then OK, but most fast food outlets sell soft drinks like Coca-Cola, Fanta, etc. These gassy drinks are extremely unhealthy because the soda 'eats' away your bones and they don't quench your thirst because they are full of sugar or sweeteners. Even the low calorie drinks are bad for you because of the soda.

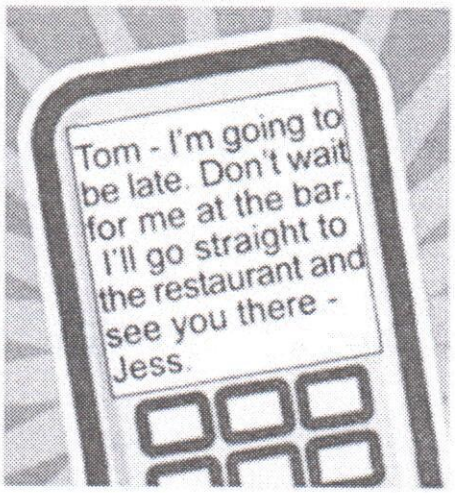

2. Fast food usually has lots of ...

A) salt.
B) fat.
C) sugar
D) all of the above.

3. You quickly get thirsty again after a soda because...

A) it has too much gas.
B) it is sugary.
C) it has too many calories.
D) it doesn't have any water.

Questions 18-20 are related to the text below.

Adult mosquitoes emerge after several days of growth. Some mosquitoes reach ***maturity*** in as few as 5 days, but most require 10–14 days before they reach maturity. Female mosquitoes need blood in order for their eggs to develop. Now you know that it is the female mosquitoes which bite you. But how do they find you — their meal of blood? Mosquitoes seek out warmth and movement — both properties of human beings and other animals. They also seek carbon dioxide, which is exhaled by humans and other animals. So while it is not exactly your wonderful personality which attracts them, the social activities of conversation and laughter — which involve movement and the exhalation of carbon dioxide — are what attract these annoying little insects!

18. How do mosquitoes find you?

A) They are attracted to carbon dioxide.
